

# Airport City Center, Düsseldorf

Modern office landscape near the Airport

# Airport City Center, Düsseldorf

## Facts and Figures

SOP Architects designed the SMART OFFICE building right next to Düsseldorf Airport. Two H-shaped building wings, which are connected by glass bridges, create the image of a huge portal.

The gaze is drawn to green inner courtyards with spacious driveways. Users and visitors enter the building on both sides via light-flooded foyers. The structural incisions in the cubature of the building ensure optimal daylight supply. The slightly shimmering metal facade looks extremely elegant. The integrated SOMMER windows - room-high, with filigree profile views - give the building shell lightness and elegance.

### CLIENT

Düsseldorfer Liegenschaftsges. mbH & Co. Objekt Airport City AG, Munich
