

US Army Elementary School, Böblingen

One of the largest schools in Baden Wurttemberg

US Army Elementary School, Böblingen

Facts and Figures

German and U.S. standards apply to the entire building complex. The elementary and high school, which opened in fall 2015, is located near the Böblingen tank barracks in the Stuttgart region. The new building is complemented by separate gymnasiums, music and theater rooms, and outdoor facilities. This creates a pleasant living space for up to 1,500 American students. For buildings with security requirements, it is important that the products are aesthetically integrated into the architecture. Decades of experience have enabled SOMMER to meet this requirement. For the Elementary & High School in Böblingen, Germany, the A-T-F-P façade and SOKALTHERM® windows with pressure wave inhibiting properties were realized.

CLIENT

ARGE Hochbau Schule Böblingen c/o Wolff & Müller Regionalbau, Stuttgart
